DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Cohen has taught a group of computational blocks with a one-to-one correspondence to a group of buffers, for the purpose of deciding availability of the buffers, where each block includes data for the availability of the corresponding buffer, receiving data for the currently selected buffer, an output which identifies the next available buffer, a third input, and another output that corresponds to the next block's third input; and that the outputs of the group of blocks creates a availability vector for the buffers they correspond to.
2. Examiner agrees that Cohen and Hennessey have not taught individually, or in combination, wherein the first output, which indicates the next available buffer, is coupled to logically AND the first input, which receives data for the availability of the corresponding buffer, with the third input. Applicant has stated this in the Remarks filed 06/30/04, starting on page 9 paragraph 3 to page 10 paragraph 1, and shows how line 28 and 32 are not equivalent and do not directly correspond to each other.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
